SUMMARY

Product Manager who conceived, defined, and shipped AI/OCR and payments features at a \$1B+ global B2B eCommerce platform operating across 40+ countries. Sole PM accountable for full product lifecycles from concept and PRD authorship through cross-functional execution and post-launch iteration. Analytical foundation in applied sciences informs a rigorous, data-driven approach to product decisions. Seeking a tech-forward PM role in the Denver area.

EXPERIENCE

Festo | Islandia, NY *Global industrial automation leader, \$3B+ revenue | \$1B+ annual eCommerce | 40+ countries*

Product Manager, eCommerce Platform

Sep 2025 – Present

- PM accountable for Shop2Cash (payments and checkout) and User Management, driving product strategy globally across a cross-functional team of 10–15 engineers and 5 designers.
- Own global roadmap prioritization and stakeholder alignment across regions, translating business goals into secure, scalable platform initiatives across payments, authentication, and user lifecycle.
- Define north star metrics and success criteria for all initiatives; maintain full accountability from discovery through PRD authorship, launch, and post-release iteration.

Associate Product Manager, eCommerce Platform

Jan 2022 – Sep 2025

Promoted into one of the first PM roles established outside Festo's European HQ — a role built around cross-regional initiatives later adopted at global scale.

- Independently conceived and shipped AI/OCR-powered Purchase Order Upload, owning the product from discovery through cross-functional execution with ML and engineering teams; projected to increase online sales 15% and eliminate a major source of order entry errors.
- Originated the Material Activation App from scratch: identified the opportunity, authored the full PRD independently, and partnered with engineering to deliver — reducing activation time 67% (3 weeks to 1 week) and cutting backlog by 70%.
- Drove 7% increase in online sales via the Quotation Flexibility Initiative, reducing quote expirations by 30% through UX redesign and workflow improvements.
- Lifted B2B reorder rates 10% through Quantity Contract digitization, saving sales teams 15 hours per week and reducing manual order touchpoints.
- Expanded product configurator to external partner portals, increasing configurable product sales by 10% and opening a new distribution channel.
- Piloted Strategic Couponing initiative targeting dormant accounts, projected to lift sales 15% in target product lines.

eBusiness Intern

Jun 2021 – Dec 2021

- Supported major eCommerce platform redesign; contributed to customer support workflow improvements and internal agent tooling.
